"I've known John since High School. We were both raised in traditional households where our parents taught us that integrity and perseverance would be invaluable character traits. John's reputation to this day is one of strong conviction and strength in the face of popular opposition. In an environment where the easiest thing to do would be to go along with the standard, John has set an example by being well informed and persuasive in his principles, always an advocate for what's right and fair in any given situation."

Curtis Corley

He also has the energy and enthusiasm to sell those ideas and our city to all who might need persuasion. He is, unquestionably, the man to lead us at this moment in time."
